Metabo 4 1/2" Angle Grinder

Metabo is well known for its top-class angle grinders. Their design is completely new and even more ergo-nomic. The innovative air-cooling concept enables higher motor output, which gives them an enormous amount of torque. The Metabo VibraTech (MVT) handle helps lower vibrations which can be damaging to the user's health. Metabo's core strength technologies are also utilized, such as the infamous Marathon Motor, S-automatic Safety Clutch and Metabo "Quick" technology for changing discs and guards without tools.

Norton Velcro Hand Back-Up Pads

HALF-MOON

The half moon pad uses a 6" NorGrip disc which adheres to the hooks on the pad face. The straight edge of the pad allows the technician to sand contours in narrow crevices.

CIRCLE

The 3/8" thick pad is composed of neoprene and foam, for excellent conformability. Each pad has an elastic hand strap to hold it firmly in place when used with a 6" NorGrip disc for scuff sanding flat or contoured surfaces
